

# SUPERCHUTE<sup>®</sup>

## CHUTES & HOISTS

### The Complete System for Trash Removal

*\* Clean large quantities of debris from buildings & roofs into containers.*

*\* Easy to Install and Use.*

*\* Quick, Safe and Efficient Trash Removal!*

The Bolt-Down Frame

# Durable Polyethylene Debris Chutes

## WELDED SECTIONS

### No Assembly Needed

TOP HOPPER SECTION

- The uppermost section
- One needed per chute system
- Entry point for debris

REGULAR SECTION

- Tube sections
- A system consists mostly of these pieces

DOOR SECTION\*

- Sections for multi-level work
- Any number per system
- Entry point for debris

\* Can. Ind. Des. 1990 RD 66842  
U.S. Pat. No. Des. 328,174

\*\* U.S. Pat. 5,472,768  
Can. Pat. 2,119,108  
U.K. Pat. 2,276,151

### WHAT YOU NEED TO KNOW ABOUT WELDED & WRAPAROUND® SECTIONS:

- All Superchute® sections are slightly conical tubes, 4 feet in height.
- Because linked sections overlap a little, 3 sections provide 10 ft. of drop.
- All sections are equipped with our safe & strong cable linking hardware.
- You can choose from six diameters: 18", 23", 27", 30", 33", 36".
- For a one-time die charge, we'll brand all of your chute sections with your co. name.

## WRAPAROUND® SECTIONS They Go Flat!

Space Savers

TOP HOPPER SECTION

READY IN 5 MINUTES!

wrench supplied

REGULAR SECTION\*\*

READY IN 1 MINUTE!

Five eyebolts are all you need to assemble a Wraparound® Regular

DOOR SECTION\*

READY IN 5 MINUTES!

wrench supplied

### BENEFITS OF THE WELDED DESIGN:

- No assembly required (permanent tubes with a welded seam).
- Sections stack like coffee cups for easy transport and storage.
- Fully compatible with all WRAPAROUND® chute sections.

### BENEFITS OF THE WRAPAROUND® DESIGN:

- Minimal storage space required: Opened chutes stack like sheets of plywood.
- Easy to transport from job-to-job.
- Fully compatible with all WELDED chute sections.

# SUPERCHUTE®

Wraparounds® are easy to transport. Truck is carrying 9 regular sections & 1 top hopper (30' of chute).

Fabrication of a shipping crate for Wraparounds® at the Superchute factory.

**SUPERCHUTE®**

## CABLE LINKING SYSTEM

All sections are equipped with proof-tested cable assemblies. Working in pairs, the newest assemblies\* allow safe suspension of up to 200 ft. or 2000 lb. of chute (whichever is reached first) with a 10:1 safety factor. Maximum height depends on chute diameter, adequacy of supporting structure & anchors.

## STEEL LINERS

If you will be throwing heavy & abrasive debris into the chute, install a few steel liners in the portion of the chute that is most likely to wear: The last few chute sections that curve into the container.

14 gauge galvanized steel construction.

## CHUTE HOISTS

U.S. Pat. 5,934,437 - Can. Pat. 2,177,741

*Simplify your chute installation with one of our supports. A chute hoist consists of a few easily assembled pieces. Each piece can be carried by a man and will fit into an elevator car. Only 5 minutes to assemble using locking pins.*

## CONTAINER DRENCHER

To prevent container fires, keep the contents of the trash container wet at all times. Use the Superchute® drencher as part of your overall fire prevention plan.

\* WARNING: Chute sections manufactured in February 1999 or later, equipped with the original cable assemblies, can be used to build a chute system up to 60 sections in height (equivalent to 200 feet or 60 meters) or 2000 lb. (900 kg) in weight, whichever is reached first, provided the two cable assemblies of each section are in new or "good as new" condition. Call Superchute Ltd. or consult the Chutes Manual for the height & weight limits of chute sections that were manufactured before February 1999. The month & year of manufacture have been branded into every section since June 1996.

- CONSULT THE SUPERCHUTE® REFERENCE GUIDE OR MANUAL FOR MORE INFORMATION.
- CLIENTS IN THE USA: MADE IN CANADA - FREE TRADE APPLIES - NO DUTIES, NO TAXES.
- LITERATURE PRINTED IN CANADA - APRIL 2007
- SUPERCHUTE® & WRAPAROUND® ARE REGISTERED TRADEMARKS OF SUPERCHUTE LTD.
